- **Institutional set-up for liquidity risk management**

The Board of Directors of the Company holds ultimate responsibility for overseeing all facets of risk management, including liquidity risk. Its duties encompass approving the governance framework, policies, strategies, and protocols governing liquidity risk within the NBFC, all in alignment with predetermined risk tolerance thresholds. Moreover, the Board authorizes the establishment of the Risk Management Committee (RMC) to diligently oversee, evaluate, monitor, and assess various risks, including liquidity, encountered by the Company. In addition, the Board formally constitutes the Asset Liability Committee (ALCO) to serve as the principal decision-making body responsible for managing the Company's asset-liability dynamics with a keen focus on risk and return. ALCO's principal objective is to support the Board in efficiently executing asset-liability management, market risk management, liquidity, and interest rate risk management, while ensuring strict adherence to established risk tolerance levels. ALCO convenes four times annually, as determined by the Committee, to effectively discharge its stipulated duties. Subsequently, minutes of these meetings are presented to the Board of Directors for their review, approval, or ratification during subsequent sessions.
